EXAMPLES OF WORK

- Avery Built Project- This is a MERN stack application that was built for a close friend of mine who passed away, this website works as a donation center for friends and family who are racking up money to build a park in his name. link for code (<https://github.com/averyricefoundation/-AveryBuilt>)
- NYT Scraper -This is a application built that utilizes a back-end to scrape and save NYT articles. Technologies Used: Node.js | Express.js | MongoDB | Mongoose | Handlebars.js | JavaScript | ES6 | jQuery | AJAX | JSON | NPM modules: Cheerio Request-Promise | Bootstrap 3 | CSS3 | HTML | link:(<https://glacial-oasis-46115.herokuapp.com/>)
- Unidos online catering - This app is a Ecommerce website that is a catering menu and ordering system built for a local business,i developed this for my friends uncle's local business. Technologies Used: MongoDB | Express.js | React | Node.js | Strapi | GraphQL | Javascript | ES6 | jQuery | AJAX | JSON | NPM | Bootstrap 3 | CSS3 | HTML5 | Link for code (<https://github.com/Yungcode34/online-unidos-catering>)
- To view these applications and more of my work please visit my personal site!
